

Defect Report

Project: Test Project
Generated: 25/11/2025, 10:12:27 pm

Summary

Total Defects: 109
Critical: 4 | High: 97 | Medium: 6 | Low: 2

Defect Details

1. Performance: Checkout API Slow

ID: 109 | Severity: Medium | Priority: Medium
Status: Open | Created: 25/11/2025

Description: Auto-detected issue from Performance Testing
Detected By: Performance Testing

2. Integration: Payment Flow Failure

ID: 108 | Severity: Critical | Priority: High
Status: In Progress | Created: 25/11/2025

Description: Auto-detected issue from Integration Testing
Detected By: Integration Testing

3. Security: Lodash Vulnerability

ID: 107 | Severity: High | Priority: High
Status: Open | Created: 25/11/2025

Description: Auto-detected issue from Security Scan
Detected By: Security Scan

4. Security: Lodash Vulnerability

ID: 106 | Severity: High | Priority: High
Status: Open | Created: 25/11/2025

Description: Auto-detected issue from Security Scan
Detected By: Security Scan

5. Performance: Checkout API Slow

ID: 105 | Severity: Medium | Priority: Medium
Status: Open | Created: 25/11/2025

Description: Auto-detected issue from Performance Testing
Detected By: Performance Testing

6. Integration: Payment Flow Failure

ID: 104 | Severity: Critical | Priority: High
Status: In Progress | Created: 25/11/2025

Description: Auto-detected issue from Integration Testing

Detected By: Integration Testing

7. Integration: Payment Flow Failure

ID: 103 | Severity: Critical | Priority: High

Status: In Progress | Created: 25/11/2025

Description: Auto-detected issue from Integration Testing

Detected By: Integration Testing

8. Security: Lodash Vulnerability

ID: 102 | Severity: High | Priority: High

Status: Open | Created: 25/11/2025

Description: Auto-detected issue from Security Scan

Detected By: Security Scan

9. Performance: Checkout API Slow

ID: 101 | Severity: Medium | Priority: Medium

Status: Open | Created: 25/11/2025

Description: Auto-detected issue from Performance Testing

Detected By: Performance Testing

10. Security Vulnerability: y18n

ID: 100 | Severity: High | Priority: High

Status: Open | Created: 25/11/2025

Description: high vulnerability in y18n

Detected By: Security Scan

Steps to Reproduce:

1. Check package.json dependencies
2. Run 'npm audit' locally
3. Observe vulnerability in package y18n

Expected Result:

Package y18n should be secure

Actual Result:

Package has high vulnerability: high vulnerability in y18n

11. Security Vulnerability: postcss-initial

ID: 99 | Severity: High | Priority: High

Status: Open | Created: 25/11/2025

Description: high vulnerability in postcss-initial

Detected By: Security Scan

Steps to Reproduce:

1. Check package.json dependencies
2. Run 'npm audit' locally
3. Observe vulnerability in package postcss-initial

Expected Result:

Package postcss-initial should be secure

Actual Result:

Package has high vulnerability: high vulnerability in postcss-initial

12. High Complexity: server\ecommerce\routes\users.js

ID: 98 | Severity: Low | Priority: Low

Status: Open | Created: 25/11/2025

Description: Cyclomatic complexity of 37 exceeds threshold of 10

Detected By: Complexity Analysis

Steps to Reproduce:

1. Open file server\ecommerce\routes\users.js
2. Analyze function complexity

Expected Result:

Cyclomatic complexity should be ≤ 10

Actual Result:

Cyclomatic complexity is 37

13. High Complexity: server\ecommerce\routes\index.js

ID: 97 | Severity: Low | Priority: Low

Status: Open | Created: 25/11/2025

Description: Cyclomatic complexity of 37 exceeds threshold of 10

Detected By: Complexity Analysis

Steps to Reproduce:

1. Open file server\ecommerce\routes\index.js
2. Analyze function complexity

Expected Result:

Cyclomatic complexity should be ≤ 10

Actual Result:

Cyclomatic complexity is 37

14. Security Vulnerability: workbox-webpack-plugin

ID: 96 | Severity: High | Priority: High

Status: Open | Created: 25/11/2025

Description: high vulnerability in workbox-webpack-plugin

Detected By: Security Scan

Steps to Reproduce:

1. Check package.json dependencies
2. Run 'npm audit' locally
3. Observe vulnerability in package workbox-webpack-plugin

Expected Result:

Package workbox-webpack-plugin should be secure

Actual Result:

Package has high vulnerability: high vulnerability in workbox-webpack-plugin

15. Security Vulnerability: semver

ID: 95 | Severity: High | Priority: High

Status: Open | Created: 25/11/2025

Description: high vulnerability in semver

Detected By: Security Scan

Steps to Reproduce:

1. Check package.json dependencies
2. Run 'npm audit' locally
3. Observe vulnerability in package semver

Expected Result:

Package semver should be secure

Actual Result:

Package has high vulnerability: high vulnerability in semver

16. Security Vulnerability: ws

ID: 94 | Severity: High | Priority: High

Status: Open | Created: 25/11/2025

Description: high vulnerability in ws

Detected By: Security Scan

Steps to Reproduce:

1. Check package.json dependencies
2. Run 'npm audit' locally
3. Observe vulnerability in package ws

Expected Result:

Package ws should be secure

Actual Result:

Package has high vulnerability: high vulnerability in ws

17. Security Vulnerability: serialize-javascript

ID: 93 | Severity: High | Priority: High

Status: Open | Created: 25/11/2025

Description: high vulnerability in serialize-javascript

Detected By: Security Scan

Steps to Reproduce:

1. Check package.json dependencies
2. Run 'npm audit' locally
3. Observe vulnerability in package serialize-javascript

Expected Result:

Package serialize-javascript should be secure

Actual Result:

Package has high vulnerability: high vulnerability in serialize-javascript

18. Security Vulnerability: workbox-build

ID: 92 | Severity: High | Priority: High

Status: Open | Created: 25/11/2025

Description: high vulnerability in workbox-build

Detected By: Security Scan

Steps to Reproduce:

1. Check package.json dependencies
2. Run 'npm audit' locally
3. Observe vulnerability in package workbox-build

Expected Result:

Package workbox-build should be secure

Actual Result:

Package has high vulnerability: high vulnerability in workbox-build

19. Security Vulnerability: webpack-dev-server

ID: 91 | Severity: High | Priority: High

Status: Open | Created: 25/11/2025

Description: high vulnerability in webpack-dev-server

Detected By: Security Scan

Steps to Reproduce:

1. Check package.json dependencies
2. Run 'npm audit' locally
3. Observe vulnerability in package webpack-dev-server

Expected Result:

Package webpack-dev-server should be secure

Actual Result:

Package has high vulnerability: high vulnerability in webpack-dev-server

20. Security Vulnerability: webpack-dev-middleware

ID: 90 | Severity: High | Priority: High

Status: Open | Created: 25/11/2025

Description: high vulnerability in webpack-dev-middleware

Detected By: Security Scan

Steps to Reproduce:

1. Check package.json dependencies
2. Run 'npm audit' locally
3. Observe vulnerability in package webpack-dev-middleware

Expected Result:

Package webpack-dev-middleware should be secure

Actual Result:

Package has high vulnerability: high vulnerability in webpack-dev-middleware

21. Security Vulnerability: watchpack-chokidar2

ID: 89 | Severity: High | Priority: High

Status: Open | Created: 25/11/2025

Description: high vulnerability in watchpack-chokidar2

Detected By: Security Scan

Steps to Reproduce:

1. Check package.json dependencies
2. Run 'npm audit' locally
3. Observe vulnerability in package watchpack-chokidar2

Expected Result:

Package watchpack-chokidar2 should be secure

Actual Result:

Package has high vulnerability: high vulnerability in watchpack-chokidar2

22. Security Vulnerability: watchpack

ID: 88 | Severity: High | Priority: High

Status: Open | Created: 25/11/2025

Description: high vulnerability in watchpack

Detected By: Security Scan

Steps to Reproduce:

1. Check package.json dependencies
2. Run 'npm audit' locally
3. Observe vulnerability in package watchpack

Expected Result:

Package watchpack should be secure

Actual Result:

Package has high vulnerability: high vulnerability in watchpack

23. Security Vulnerability: url-parse

ID: 87 | Severity: High | Priority: High

Status: Open | Created: 25/11/2025

Description: critical vulnerability in url-parse

Detected By: Security Scan

Steps to Reproduce:

1. Check package.json dependencies
2. Run 'npm audit' locally
3. Observe vulnerability in package url-parse

Expected Result:

Package url-parse should be secure

Actual Result:

Package has critical vulnerability: critical vulnerability in url-parse

24. Security Vulnerability: trim-newlines

ID: 86 | Severity: High | Priority: High

Status: Open | Created: 25/11/2025

Description: high vulnerability in trim-newlines

Detected By: Security Scan

Steps to Reproduce:

1. Check package.json dependencies
2. Run 'npm audit' locally
3. Observe vulnerability in package trim-newlines

Expected Result:

Package trim-newlines should be secure

Actual Result:

Package has high vulnerability: high vulnerability in trim-newlines

25. Security Vulnerability: ttmpl

ID: 85 | Severity: High | Priority: High

Status: Open | Created: 25/11/2025

Description: high vulnerability in ttmpl

Detected By: Security Scan

Steps to Reproduce:

1. Check package.json dependencies
2. Run 'npm audit' locally
3. Observe vulnerability in package ttmpl

Expected Result:

Package ttmpl should be secure

Actual Result:

Package has high vulnerability: high vulnerability in ttmpl

26. Security Vulnerability: terser-webpack-plugin

ID: 84 | Severity: High | Priority: High

Status: Open | Created: 25/11/2025

Description: high vulnerability in terser-webpack-plugin

Detected By: Security Scan

Steps to Reproduce:

1. Check package.json dependencies
2. Run 'npm audit' locally
3. Observe vulnerability in package terser-webpack-plugin

Expected Result:

Package terser-webpack-plugin should be secure

Actual Result:

Package has high vulnerability: high vulnerability in terser-webpack-plugin

27. Security Vulnerability: terser

ID: 83 | Severity: High | Priority: High

Status: Open | Created: 25/11/2025

Description: high vulnerability in terser

Detected By: Security Scan

Steps to Reproduce:

1. Check package.json dependencies
2. Run 'npm audit' locally
3. Observe vulnerability in package terser

Expected Result:

Package terser should be secure

Actual Result:

Package has high vulnerability: high vulnerability in terser

28. Security Vulnerability: tar

ID: 82 | Severity: High | Priority: High

Status: Open | Created: 25/11/2025

Description: high vulnerability in tar

Detected By: Security Scan

Steps to Reproduce:

1. Check package.json dependencies
2. Run 'npm audit' locally
3. Observe vulnerability in package tar

Expected Result:

Package tar should be secure

Actual Result:

Package has high vulnerability: high vulnerability in tar

29. Security Vulnerability: svgo

ID: 81 | Severity: High | Priority: High

Status: Open | Created: 25/11/2025

Description: high vulnerability in svgo

Detected By: Security Scan

Steps to Reproduce:

1. Check package.json dependencies
2. Run 'npm audit' locally
3. Observe vulnerability in package svgo

Expected Result:

Package svgo should be secure

Actual Result:

Package has high vulnerability: high vulnerability in svgo

30. Security Vulnerability: ssri

ID: 80 | Severity: High | Priority: High

Status: Open | Created: 25/11/2025

Description: high vulnerability in ssri

Detected By: Security Scan

Steps to Reproduce:

1. Check package.json dependencies
2. Run 'npm audit' locally
3. Observe vulnerability in package ssri

Expected Result:

Package ssri should be secure

Actual Result:

Package has high vulnerability: high vulnerability in ssri

31. Security Vulnerability: shell-quote

ID: 79 | Severity: High | Priority: High

Status: Open | Created: 25/11/2025

Description: critical vulnerability in shell-quote

Detected By: Security Scan

Steps to Reproduce:

1. Check package.json dependencies
2. Run 'npm audit' locally
3. Observe vulnerability in package shell-quote

Expected Result:

Package shell-quote should be secure

Actual Result:

Package has critical vulnerability: critical vulnerability in shell-quote

32. Security Vulnerability: sha.js

ID: 78 | Severity: High | Priority: High

Status: Open | Created: 25/11/2025

Description: critical vulnerability in sha.js

Detected By: Security Scan

Steps to Reproduce:

1. Check package.json dependencies
2. Run 'npm audit' locally
3. Observe vulnerability in package sha.js

Expected Result:

Package sha.js should be secure

Actual Result:

Package has critical vulnerability: critical vulnerability in sha.js

33. Security Vulnerability: node-sass

ID: 77 | Severity: High | Priority: High

Status: Open | Created: 25/11/2025

Description: high vulnerability in node-sass

Detected By: Security Scan

Steps to Reproduce:

1. Check package.json dependencies
2. Run 'npm audit' locally

3. Observe vulnerability in package node-sass

Expected Result:

Package node-sass should be secure

Actual Result:

Package has high vulnerability: high vulnerability in node-sass

34. Security Vulnerability: postcss-svg

ID: 76 | Severity: High | Priority: High

Status: Open | Created: 25/11/2025

Description: high vulnerability in postcss-svg

Detected By: Security Scan

Steps to Reproduce:

1. Check package.json dependencies
2. Run 'npm audit' locally
3. Observe vulnerability in package postcss-svg

Expected Result:

Package postcss-svg should be secure

Actual Result:

Package has high vulnerability: high vulnerability in postcss-svg

35. Security Vulnerability: selfsigned

ID: 75 | Severity: High | Priority: High

Status: Open | Created: 25/11/2025

Description: high vulnerability in selfsigned

Detected By: Security Scan

Steps to Reproduce:

1. Check package.json dependencies
2. Run 'npm audit' locally
3. Observe vulnerability in package selfsigned

Expected Result:

Package selfsigned should be secure

Actual Result:

Package has high vulnerability: high vulnerability in selfsigned

36. Security Vulnerability: scss-tokenizer

ID: 74 | Severity: High | Priority: High

Status: Open | Created: 25/11/2025

Description: high vulnerability in scss-tokenizer

Detected By: Security Scan

Steps to Reproduce:

1. Check package.json dependencies
2. Run 'npm audit' locally
3. Observe vulnerability in package scss-tokenizer

Expected Result:

Package scss-tokenizer should be secure

Actual Result:

Package has high vulnerability: high vulnerability in scss-tokenizer

37. Security Vulnerability: sass-graph

ID: 73 | Severity: High | Priority: High

Status: Open | Created: 25/11/2025

Description: high vulnerability in sass-graph

Detected By: Security Scan

Steps to Reproduce:

1. Check package.json dependencies
2. Run 'npm audit' locally
3. Observe vulnerability in package sass-graph

Expected Result:

Package sass-graph should be secure

Actual Result:

Package has high vulnerability: high vulnerability in sass-graph

38. Security Vulnerability: resolve-url-loader

ID: 72 | Severity: High | Priority: High

Status: Open | Created: 25/11/2025

Description: high vulnerability in resolve-url-loader

Detected By: Security Scan

Steps to Reproduce:

1. Check package.json dependencies
2. Run 'npm audit' locally
3. Observe vulnerability in package resolve-url-loader

Expected Result:

Package resolve-url-loader should be secure

Actual Result:

Package has high vulnerability: high vulnerability in resolve-url-loader

39. Security Vulnerability: request

ID: 71 | Severity: High | Priority: High

Status: Open | Created: 25/11/2025

Description: critical vulnerability in request

Detected By: Security Scan

Steps to Reproduce:

1. Check package.json dependencies
2. Run 'npm audit' locally
3. Observe vulnerability in package request

Expected Result:

Package request should be secure

Actual Result:

Package has critical vulnerability: critical vulnerability in request

40. Security Vulnerability: renderkid

ID: 70 | Severity: High | Priority: High

Status: Open | Created: 25/11/2025

Description: high vulnerability in renderkid

Detected By: Security Scan

Steps to Reproduce:

1. Check package.json dependencies
2. Run 'npm audit' locally

3. Observe vulnerability in package renderkid

Expected Result:

Package renderkid should be secure

Actual Result:

Package has high vulnerability: high vulnerability in renderkid

41. Security Vulnerability: recursive-readdir

ID: 69 | Severity: High | Priority: High

Status: Open | Created: 25/11/2025

Description: high vulnerability in recursive-readdir

Detected By: Security Scan

Steps to Reproduce:

1. Check package.json dependencies
2. Run 'npm audit' locally
3. Observe vulnerability in package recursive-readdir

Expected Result:

Package recursive-readdir should be secure

Actual Result:

Package has high vulnerability: high vulnerability in recursive-readdir

42. Security Vulnerability: react-scripts

ID: 68 | Severity: High | Priority: High

Status: Open | Created: 25/11/2025

Description: high vulnerability in react-scripts

Detected By: Security Scan

Steps to Reproduce:

1. Check package.json dependencies
2. Run 'npm audit' locally
3. Observe vulnerability in package react-scripts

Expected Result:

Package react-scripts should be secure

Actual Result:

Package has high vulnerability: high vulnerability in react-scripts

43. Security Vulnerability: react-dev-utils

ID: 67 | Severity: High | Priority: High

Status: Open | Created: 25/11/2025

Description: critical vulnerability in react-dev-utils

Detected By: Security Scan

Steps to Reproduce:

1. Check package.json dependencies
2. Run 'npm audit' locally
3. Observe vulnerability in package react-dev-utils

Expected Result:

Package react-dev-utils should be secure

Actual Result:

Package has critical vulnerability: critical vulnerability in react-dev-utils

44. Security Vulnerability: qs

ID: 66 | Severity: High | Priority: High

Status: Open | Created: 25/11/2025

Description: high vulnerability in qs

Detected By: Security Scan

Steps to Reproduce:

1. Check package.json dependencies
2. Run 'npm audit' locally
3. Observe vulnerability in package qs

Expected Result:

Package qs should be secure

Actual Result:

Package has high vulnerability: high vulnerability in qs

45. Security Vulnerability: lodash-es

ID: 65 | Severity: High | Priority: High

Status: Open | Created: 25/11/2025

Description: high vulnerability in lodash-es

Detected By: Security Scan

Steps to Reproduce:

1. Check package.json dependencies
2. Run 'npm audit' locally
3. Observe vulnerability in package lodash-es

Expected Result:

Package lodash-es should be secure

Actual Result:

Package has high vulnerability: high vulnerability in lodash-es

46. Security Vulnerability: merge-deep

ID: 64 | Severity: High | Priority: High

Status: Open | Created: 25/11/2025

Description: critical vulnerability in merge-deep

Detected By: Security Scan

Steps to Reproduce:

1. Check package.json dependencies
2. Run 'npm audit' locally
3. Observe vulnerability in package merge-deep

Expected Result:

Package merge-deep should be secure

Actual Result:

Package has critical vulnerability: critical vulnerability in merge-deep

47. Security Vulnerability: pbkdf2

ID: 63 | Severity: High | Priority: High

Status: Open | Created: 25/11/2025

Description: critical vulnerability in pbkdf2

Detected By: Security Scan

Steps to Reproduce:

1. Check package.json dependencies
2. Run 'npm audit' locally

3. Observe vulnerability in package pbkdf2

Expected Result:

Package pbkdf2 should be secure

Actual Result:

Package has critical vulnerability: critical vulnerability in pbkdf2

48. Security Vulnerability: object-path

ID: 62 | Severity: High | Priority: High

Status: Open | Created: 25/11/2025

Description: high vulnerability in object-path

Detected By: Security Scan

Steps to Reproduce:

1. Check package.json dependencies
2. Run 'npm audit' locally
3. Observe vulnerability in package object-path

Expected Result:

Package object-path should be secure

Actual Result:

Package has high vulnerability: high vulnerability in object-path

49. Security Vulnerability: path-to-regexp

ID: 61 | Severity: High | Priority: High

Status: Open | Created: 25/11/2025

Description: high vulnerability in path-to-regexp

Detected By: Security Scan

Steps to Reproduce:

1. Check package.json dependencies
2. Run 'npm audit' locally
3. Observe vulnerability in package path-to-regexp

Expected Result:

Package path-to-regexp should be secure

Actual Result:

Package has high vulnerability: high vulnerability in path-to-regexp

50. Security Vulnerability: nth-check

ID: 60 | Severity: High | Priority: High

Status: Open | Created: 25/11/2025

Description: high vulnerability in nth-check

Detected By: Security Scan

Steps to Reproduce:

1. Check package.json dependencies
2. Run 'npm audit' locally
3. Observe vulnerability in package nth-check

Expected Result:

Package nth-check should be secure

Actual Result:

Package has high vulnerability: high vulnerability in nth-check

51. Security Vulnerability: lodash.template

ID: 59 | Severity: High | Priority: High

Status: Open | Created: 25/11/2025

Description: high vulnerability in lodash.template

Detected By: Security Scan

Steps to Reproduce:

1. Check package.json dependencies
2. Run 'npm audit' locally
3. Observe vulnerability in package lodash.template

Expected Result:

Package lodash.template should be secure

Actual Result:

Package has high vulnerability: high vulnerability in lodash.template

52. Security Vulnerability: node-gyp

ID: 58 | Severity: High | Priority: High

Status: Open | Created: 25/11/2025

Description: high vulnerability in node-gyp

Detected By: Security Scan

Steps to Reproduce:

1. Check package.json dependencies
2. Run 'npm audit' locally
3. Observe vulnerability in package node-gyp

Expected Result:

Package node-gyp should be secure

Actual Result:

Package has high vulnerability: high vulnerability in node-gyp

53. Security Vulnerability: node-forge

ID: 57 | Severity: High | Priority: High

Status: Open | Created: 25/11/2025

Description: high vulnerability in node-forge

Detected By: Security Scan

Steps to Reproduce:

1. Check package.json dependencies
2. Run 'npm audit' locally
3. Observe vulnerability in package node-forge

Expected Result:

Package node-forge should be secure

Actual Result:

Package has high vulnerability: high vulnerability in node-forge

54. Security Vulnerability: minimist

ID: 56 | Severity: High | Priority: High

Status: Open | Created: 25/11/2025

Description: critical vulnerability in minimist

Detected By: Security Scan

Steps to Reproduce:

1. Check package.json dependencies
2. Run 'npm audit' locally

3. Observe vulnerability in package minimist

Expected Result:

Package minimist should be secure

Actual Result:

Package has critical vulnerability: critical vulnerability in minimist

55. Security Vulnerability: minimatch

ID: 55 | Severity: High | Priority: High

Status: Open | Created: 25/11/2025

Description: high vulnerability in minimatch

Detected By: Security Scan

Steps to Reproduce:

1. Check package.json dependencies
2. Run 'npm audit' locally
3. Observe vulnerability in package minimatch

Expected Result:

Package minimatch should be secure

Actual Result:

Package has high vulnerability: high vulnerability in minimatch

56. Security Vulnerability: micromatch

ID: 54 | Severity: High | Priority: High

Status: Open | Created: 25/11/2025

Description: high vulnerability in micromatch

Detected By: Security Scan

Steps to Reproduce:

1. Check package.json dependencies
2. Run 'npm audit' locally
3. Observe vulnerability in package micromatch

Expected Result:

Package micromatch should be secure

Actual Result:

Package has high vulnerability: high vulnerability in micromatch

57. Security Vulnerability: cross-spawn

ID: 53 | Severity: High | Priority: High

Status: Open | Created: 25/11/2025

Description: high vulnerability in cross-spawn

Detected By: Security Scan

Steps to Reproduce:

1. Check package.json dependencies
2. Run 'npm audit' locally
3. Observe vulnerability in package cross-spawn

Expected Result:

Package cross-spawn should be secure

Actual Result:

Package has high vulnerability: high vulnerability in cross-spawn

58. Security Vulnerability: meow

ID: 52 | Severity: High | Priority: High

Status: Open | Created: 25/11/2025

Description: high vulnerability in meow

Detected By: Security Scan

Steps to Reproduce:

1. Check package.json dependencies
2. Run 'npm audit' locally
3. Observe vulnerability in package meow

Expected Result:

Package meow should be secure

Actual Result:

Package has high vulnerability: high vulnerability in meow

59. Security Vulnerability: is-svg

ID: 51 | Severity: High | Priority: High

Status: Open | Created: 25/11/2025

Description: high vulnerability in is-svg

Detected By: Security Scan

Steps to Reproduce:

1. Check package.json dependencies
2. Run 'npm audit' locally
3. Observe vulnerability in package is-svg

Expected Result:

Package is-svg should be secure

Actual Result:

Package has high vulnerability: high vulnerability in is-svg

60. Security Vulnerability: glob-parent

ID: 50 | Severity: High | Priority: High

Status: Open | Created: 25/11/2025

Description: high vulnerability in glob-parent

Detected By: Security Scan

Steps to Reproduce:

1. Check package.json dependencies
2. Run 'npm audit' locally
3. Observe vulnerability in package glob-parent

Expected Result:

Package glob-parent should be secure

Actual Result:

Package has high vulnerability: high vulnerability in glob-parent

61. Security Vulnerability: lodash

ID: 49 | Severity: High | Priority: High

Status: Open | Created: 25/11/2025

Description: high vulnerability in lodash

Detected By: Security Scan

Steps to Reproduce:

1. Check package.json dependencies
2. Run 'npm audit' locally

3. Observe vulnerability in package lodash

Expected Result:

Package lodash should be secure

Actual Result:

Package has high vulnerability: high vulnerability in lodash

62. Security Vulnerability: loader-utils

ID: 48 | Severity: High | Priority: High

Status: Open | Created: 25/11/2025

Description: critical vulnerability in loader-utils

Detected By: Security Scan

Steps to Reproduce:

1. Check package.json dependencies
2. Run 'npm audit' locally
3. Observe vulnerability in package loader-utils

Expected Result:

Package loader-utils should be secure

Actual Result:

Package has critical vulnerability: critical vulnerability in loader-utils

63. Security Vulnerability: jsprim

ID: 47 | Severity: High | Priority: High

Status: Open | Created: 25/11/2025

Description: critical vulnerability in jsprim

Detected By: Security Scan

Steps to Reproduce:

1. Check package.json dependencies
2. Run 'npm audit' locally
3. Observe vulnerability in package jsprim

Expected Result:

Package jsprim should be secure

Actual Result:

Package has critical vulnerability: critical vulnerability in jsprim

64. Security Vulnerability: json5

ID: 46 | Severity: High | Priority: High

Status: Open | Created: 25/11/2025

Description: high vulnerability in json5

Detected By: Security Scan

Steps to Reproduce:

1. Check package.json dependencies
2. Run 'npm audit' locally
3. Observe vulnerability in package json5

Expected Result:

Package json5 should be secure

Actual Result:

Package has high vulnerability: high vulnerability in json5

65. Security Vulnerability: json-schema

ID: 45 | Severity: High | Priority: High

Status: Open | Created: 25/11/2025

Description: critical vulnerability in json-schema

Detected By: Security Scan

Steps to Reproduce:

1. Check package.json dependencies
2. Run 'npm audit' locally
3. Observe vulnerability in package json-schema

Expected Result:

Package json-schema should be secure

Actual Result:

Package has critical vulnerability: critical vulnerability in json-schema

66. Security Vulnerability: @svgr/webpack

ID: 44 | Severity: High | Priority: High

Status: Open | Created: 25/11/2025

Description: high vulnerability in @svgr/webpack

Detected By: Security Scan

Steps to Reproduce:

1. Check package.json dependencies
2. Run 'npm audit' locally
3. Observe vulnerability in package @svgr/webpack

Expected Result:

Package @svgr/webpack should be secure

Actual Result:

Package has high vulnerability: high vulnerability in @svgr/webpack

67. Security Vulnerability: ip

ID: 43 | Severity: High | Priority: High

Status: Open | Created: 25/11/2025

Description: high vulnerability in ip

Detected By: Security Scan

Steps to Reproduce:

1. Check package.json dependencies
2. Run 'npm audit' locally
3. Observe vulnerability in package ip

Expected Result:

Package ip should be secure

Actual Result:

Package has high vulnerability: high vulnerability in ip

68. Security Vulnerability: ini

ID: 42 | Severity: High | Priority: High

Status: Open | Created: 25/11/2025

Description: high vulnerability in ini

Detected By: Security Scan

Steps to Reproduce:

1. Check package.json dependencies
2. Run 'npm audit' locally

3. Observe vulnerability in package ini

Expected Result:

Package ini should be secure

Actual Result:

Package has high vulnerability: high vulnerability in ini

69. Security Vulnerability: http-proxy-middleware

ID: 41 | Severity: High | Priority: High

Status: Open | Created: 25/11/2025

Description: high vulnerability in http-proxy-middleware

Detected By: Security Scan

Steps to Reproduce:

1. Check package.json dependencies
2. Run 'npm audit' locally
3. Observe vulnerability in package http-proxy-middleware

Expected Result:

Package http-proxy-middleware should be secure

Actual Result:

Package has high vulnerability: high vulnerability in http-proxy-middleware

70. Security Vulnerability: form-data

ID: 40 | Severity: High | Priority: High

Status: Open | Created: 25/11/2025

Description: critical vulnerability in form-data

Detected By: Security Scan

Steps to Reproduce:

1. Check package.json dependencies
2. Run 'npm audit' locally
3. Observe vulnerability in package form-data

Expected Result:

Package form-data should be secure

Actual Result:

Package has critical vulnerability: critical vulnerability in form-data

71. Security Vulnerability: follow-redirects

ID: 39 | Severity: High | Priority: High

Status: Open | Created: 25/11/2025

Description: high vulnerability in follow-redirects

Detected By: Security Scan

Steps to Reproduce:

1. Check package.json dependencies
2. Run 'npm audit' locally
3. Observe vulnerability in package follow-redirects

Expected Result:

Package follow-redirects should be secure

Actual Result:

Package has high vulnerability: high vulnerability in follow-redirects

72. Security Vulnerability: express

ID: 38 | Severity: High | Priority: High

Status: Open | Created: 25/11/2025

Description: high vulnerability in express

Detected By: Security Scan

Steps to Reproduce:

1. Check package.json dependencies
2. Run 'npm audit' locally
3. Observe vulnerability in package express

Expected Result:

Package express should be secure

Actual Result:

Package has high vulnerability: high vulnerability in express

73. Security Vulnerability: eventsource

ID: 37 | Severity: High | Priority: High

Status: Open | Created: 25/11/2025

Description: critical vulnerability in eventsource

Detected By: Security Scan

Steps to Reproduce:

1. Check package.json dependencies
2. Run 'npm audit' locally
3. Observe vulnerability in package eventsource

Expected Result:

Package eventsource should be secure

Actual Result:

Package has critical vulnerability: critical vulnerability in eventsource

74. Security Vulnerability: elliptic

ID: 36 | Severity: High | Priority: High

Status: Open | Created: 25/11/2025

Description: critical vulnerability in elliptic

Detected By: Security Scan

Steps to Reproduce:

1. Check package.json dependencies
2. Run 'npm audit' locally
3. Observe vulnerability in package elliptic

Expected Result:

Package elliptic should be secure

Actual Result:

Package has critical vulnerability: critical vulnerability in elliptic

75. Security Vulnerability: dns-packet

ID: 35 | Severity: High | Priority: High

Status: Open | Created: 25/11/2025

Description: high vulnerability in dns-packet

Detected By: Security Scan

Steps to Reproduce:

1. Check package.json dependencies
2. Run 'npm audit' locally

3. Observe vulnerability in package dns-packet

Expected Result:

Package dns-packet should be secure

Actual Result:

Package has high vulnerability: high vulnerability in dns-packet

76. Security Vulnerability: decode-uri-component

ID: 34 | Severity: High | Priority: High

Status: Open | Created: 25/11/2025

Description: high vulnerability in decode-uri-component

Detected By: Security Scan

Steps to Reproduce:

1. Check package.json dependencies
2. Run 'npm audit' locally
3. Observe vulnerability in package decode-uri-component

Expected Result:

Package decode-uri-component should be secure

Actual Result:

Package has high vulnerability: high vulnerability in decode-uri-component

77. Security Vulnerability: css-select

ID: 33 | Severity: High | Priority: High

Status: Open | Created: 25/11/2025

Description: high vulnerability in css-select

Detected By: Security Scan

Steps to Reproduce:

1. Check package.json dependencies
2. Run 'npm audit' locally
3. Observe vulnerability in package css-select

Expected Result:

Package css-select should be secure

Actual Result:

Package has high vulnerability: high vulnerability in css-select

78. Security Vulnerability: adjust-sourcemap-loader

ID: 32 | Severity: High | Priority: High

Status: Open | Created: 25/11/2025

Description: high vulnerability in adjust-sourcemap-loader

Detected By: Security Scan

Steps to Reproduce:

1. Check package.json dependencies
2. Run 'npm audit' locally
3. Observe vulnerability in package adjust-sourcemap-loader

Expected Result:

Package adjust-sourcemap-loader should be secure

Actual Result:

Package has high vulnerability: high vulnerability in adjust-sourcemap-loader

79. Security Vulnerability: core-js-compat

ID: 31 | Severity: High | Priority: High

Status: Open | Created: 25/11/2025

Description: high vulnerability in core-js-compat

Detected By: Security Scan

Steps to Reproduce:

1. Check package.json dependencies
2. Run 'npm audit' locally
3. Observe vulnerability in package core-js-compat

Expected Result:

Package core-js-compat should be secure

Actual Result:

Package has high vulnerability: high vulnerability in core-js-compat

80. Security Vulnerability: cipher-base

ID: 30 | Severity: High | Priority: High

Status: Open | Created: 25/11/2025

Description: critical vulnerability in cipher-base

Detected By: Security Scan

Steps to Reproduce:

1. Check package.json dependencies
2. Run 'npm audit' locally
3. Observe vulnerability in package cipher-base

Expected Result:

Package cipher-base should be secure

Actual Result:

Package has critical vulnerability: critical vulnerability in cipher-base

81. Security Vulnerability: chokidar

ID: 29 | Severity: High | Priority: High

Status: Open | Created: 25/11/2025

Description: high vulnerability in chokidar

Detected By: Security Scan

Steps to Reproduce:

1. Check package.json dependencies
2. Run 'npm audit' locally
3. Observe vulnerability in package chokidar

Expected Result:

Package chokidar should be secure

Actual Result:

Package has high vulnerability: high vulnerability in chokidar

82. Security Vulnerability: browserify-sign

ID: 28 | Severity: High | Priority: High

Status: Open | Created: 25/11/2025

Description: high vulnerability in browserify-sign

Detected By: Security Scan

Steps to Reproduce:

1. Check package.json dependencies
2. Run 'npm audit' locally

3. Observe vulnerability in package browserify-sign

Expected Result:

Package browserify-sign should be secure

Actual Result:

Package has high vulnerability: high vulnerability in browserify-sign

83. Security Vulnerability: braces

ID: 27 | Severity: High | Priority: High

Status: Open | Created: 25/11/2025

Description: high vulnerability in braces

Detected By: Security Scan

Steps to Reproduce:

1. Check package.json dependencies
2. Run 'npm audit' locally
3. Observe vulnerability in package braces

Expected Result:

Package braces should be secure

Actual Result:

Package has high vulnerability: high vulnerability in braces

84. Security Vulnerability: body-parser

ID: 26 | Severity: High | Priority: High

Status: Open | Created: 25/11/2025

Description: high vulnerability in body-parser

Detected By: Security Scan

Steps to Reproduce:

1. Check package.json dependencies
2. Run 'npm audit' locally
3. Observe vulnerability in package body-parser

Expected Result:

Package body-parser should be secure

Actual Result:

Package has high vulnerability: high vulnerability in body-parser

85. Security Vulnerability: axios

ID: 25 | Severity: High | Priority: High

Status: Open | Created: 25/11/2025

Description: high vulnerability in axios

Detected By: Security Scan

Steps to Reproduce:

1. Check package.json dependencies
2. Run 'npm audit' locally
3. Observe vulnerability in package axios

Expected Result:

Package axios should be secure

Actual Result:

Package has high vulnerability: high vulnerability in axios

86. Security Vulnerability: async

ID: 24 | Severity: High | Priority: High

Status: Open | Created: 25/11/2025

Description: high vulnerability in async

Detected By: Security Scan

Steps to Reproduce:

1. Check package.json dependencies
2. Run 'npm audit' locally
3. Observe vulnerability in package async

Expected Result:

Package async should be secure

Actual Result:

Package has high vulnerability: high vulnerability in async

87. Security Vulnerability: ansi-regex

ID: 23 | Severity: High | Priority: High

Status: Open | Created: 25/11/2025

Description: high vulnerability in ansi-regex

Detected By: Security Scan

Steps to Reproduce:

1. Check package.json dependencies
2. Run 'npm audit' locally
3. Observe vulnerability in package ansi-regex

Expected Result:

Package ansi-regex should be secure

Actual Result:

Package has high vulnerability: high vulnerability in ansi-regex

88. Security Vulnerability: ansi-html

ID: 22 | Severity: High | Priority: High

Status: Open | Created: 25/11/2025

Description: high vulnerability in ansi-html

Detected By: Security Scan

Steps to Reproduce:

1. Check package.json dependencies
2. Run 'npm audit' locally
3. Observe vulnerability in package ansi-html

Expected Result:

Package ansi-html should be secure

Actual Result:

Package has high vulnerability: high vulnerability in ansi-html

89. Security Vulnerability: @svgr/plugin-svg

ID: 21 | Severity: High | Priority: High

Status: Open | Created: 25/11/2025

Description: high vulnerability in @svgr/plugin-svg

Detected By: Security Scan

Steps to Reproduce:

1. Check package.json dependencies
2. Run 'npm audit' locally

3. Observe vulnerability in package @svgr/plugin-svgo

Expected Result:

Package @svgr/plugin-svgo should be secure

Actual Result:

Package has high vulnerability: high vulnerability in @svgr/plugin-svgo

90. Security Vulnerability: @babel/traverse

ID: 20 | Severity: High | Priority: High

Status: Open | Created: 25/11/2025

Description: critical vulnerability in @babel/traverse

Detected By: Security Scan

Steps to Reproduce:

1. Check package.json dependencies
2. Run 'npm audit' locally
3. Observe vulnerability in package @babel/traverse

Expected Result:

Package @babel/traverse should be secure

Actual Result:

Package has critical vulnerability: critical vulnerability in @babel/traverse

91. Security Vulnerability: @babel/traverse

ID: 19 | Severity: High | Priority: High

Status: Open | Created: 25/11/2025

Description: critical vulnerability in @babel/traverse

Detected By: Security Scan

Steps to Reproduce:

1. Check package.json dependencies
2. Run 'npm audit' locally
3. Observe vulnerability in package @babel/traverse

Expected Result:

Package @babel/traverse should be secure

Actual Result:

Package has critical vulnerability: critical vulnerability in @babel/traverse

92. Security Vulnerability: cross-spawn

ID: 18 | Severity: High | Priority: High

Status: Open | Created: 25/11/2025

Description: high vulnerability in cross-spawn

Detected By: Security Scan

Steps to Reproduce:

1. Check package.json dependencies
2. Run 'npm audit' locally
3. Observe vulnerability in package cross-spawn

Expected Result:

Package cross-spawn should be secure

Actual Result:

Package has high vulnerability: high vulnerability in cross-spawn

93. Security Vulnerability: braces

ID: 17 | Severity: High | Priority: High

Status: Open | Created: 25/11/2025

Description: high vulnerability in braces

Detected By: Security Scan

Steps to Reproduce:

1. Check package.json dependencies
2. Run 'npm audit' locally
3. Observe vulnerability in package braces

Expected Result:

Package braces should be secure

Actual Result:

Package has high vulnerability: high vulnerability in braces

94. Security Vulnerability: vite

ID: 16 | Severity: High | Priority: High

Status: Open | Created: 25/11/2025

Description: high vulnerability in vite

Detected By: Security Scan

Steps to Reproduce:

1. Check package.json dependencies
2. Run 'npm audit' locally
3. Observe vulnerability in package vite

Expected Result:

Package vite should be secure

Actual Result:

Package has high vulnerability: high vulnerability in vite

95. Security Vulnerability: semver

ID: 15 | Severity: High | Priority: High

Status: Open | Created: 25/11/2025

Description: high vulnerability in semver

Detected By: Security Scan

Steps to Reproduce:

1. Check package.json dependencies
2. Run 'npm audit' locally
3. Observe vulnerability in package semver

Expected Result:

Package semver should be secure

Actual Result:

Package has high vulnerability: high vulnerability in semver

96. Security Vulnerability: rollup

ID: 14 | Severity: High | Priority: High

Status: Open | Created: 25/11/2025

Description: high vulnerability in rollup

Detected By: Security Scan

Steps to Reproduce:

1. Check package.json dependencies
2. Run 'npm audit' locally

3. Observe vulnerability in package rollup

Expected Result:

Package rollup should be secure

Actual Result:

Package has high vulnerability: high vulnerability in rollup

97. Security Vulnerability: protobufjs

ID: 13 | Severity: High | Priority: High

Status: Open | Created: 25/11/2025

Description: critical vulnerability in protobufjs

Detected By: Security Scan

Steps to Reproduce:

1. Check package.json dependencies
2. Run 'npm audit' locally
3. Observe vulnerability in package protobufjs

Expected Result:

Package protobufjs should be secure

Actual Result:

Package has critical vulnerability: critical vulnerability in protobufjs

98. Static Analysis Error: no-undef

ID: 12 | Severity: Medium | Priority: Medium

Status: Open | Created: 25/11/2025

Description: '__dirname' is not defined. in /vite.config.js:10

Detected By: Static Analysis

Steps to Reproduce:

1. Open file /vite.config.js
2. Go to line 10
3. Observe code violation for rule no-undef

Expected Result:

Code should comply with rule no-undef

Actual Result:

Code violates rule: '__dirname' is not defined.

99. Security Vulnerability: braces

ID: 11 | Severity: High | Priority: High

Status: Open | Created: 25/11/2025

Description: high vulnerability in braces

Detected By: Security Scan

Steps to Reproduce:

1. Check package.json dependencies
2. Run 'npm audit' locally
3. Observe vulnerability in package braces

Expected Result:

Package braces should be secure

Actual Result:

Package has high vulnerability: high vulnerability in braces

100. Security Vulnerability: protobufjs

ID: 10 | Severity: High | Priority: High

Status: Open | Created: 25/11/2025

Description: critical vulnerability in protobufjs

Detected By: Security Scan

Steps to Reproduce:

1. Check package.json dependencies
2. Run 'npm audit' locally
3. Observe vulnerability in package protobufjs

Expected Result:

Package protobufjs should be secure

Actual Result:

Package has critical vulnerability: critical vulnerability in protobufjs

101. Security Vulnerability: vite

ID: 9 | Severity: High | Priority: High

Status: Open | Created: 25/11/2025

Description: high vulnerability in vite

Detected By: Security Scan

Steps to Reproduce:

1. Check package.json dependencies
2. Run 'npm audit' locally
3. Observe vulnerability in package vite

Expected Result:

Package vite should be secure

Actual Result:

Package has high vulnerability: high vulnerability in vite

102. Security Vulnerability: semver

ID: 8 | Severity: High | Priority: High

Status: Open | Created: 25/11/2025

Description: high vulnerability in semver

Detected By: Security Scan

Steps to Reproduce:

1. Check package.json dependencies
2. Run 'npm audit' locally
3. Observe vulnerability in package semver

Expected Result:

Package semver should be secure

Actual Result:

Package has high vulnerability: high vulnerability in semver

103. Security Vulnerability: rollup

ID: 7 | Severity: High | Priority: High

Status: Open | Created: 25/11/2025

Description: high vulnerability in rollup

Detected By: Security Scan

Steps to Reproduce:

1. Check package.json dependencies
2. Run 'npm audit' locally

3. Observe vulnerability in package rollup

Expected Result:

Package rollup should be secure

Actual Result:

Package has high vulnerability: high vulnerability in rollup

104. Static Analysis Error: no-undef

ID: 6 | Severity: Medium | Priority: Medium

Status: Open | Created: 25/11/2025

Description: '__dirname' is not defined. in /vite.config.js:10

Detected By: Static Analysis

Steps to Reproduce:

1. Open file /vite.config.js
2. Go to line 10
3. Observe code violation for rule no-undef

Expected Result:

Code should comply with rule no-undef

Actual Result:

Code violates rule: '__dirname' is not defined.

105. Security Vulnerability: cross-spawn

ID: 5 | Severity: High | Priority: High

Status: Open | Created: 25/11/2025

Description: high vulnerability in cross-spawn

Detected By: Security Scan

Steps to Reproduce:

1. Check package.json dependencies
2. Run 'npm audit' locally
3. Observe vulnerability in package cross-spawn

Expected Result:

Package cross-spawn should be secure

Actual Result:

Package has high vulnerability: high vulnerability in cross-spawn

106. Security Vulnerability: @babel/traverse

ID: 4 | Severity: High | Priority: High

Status: Open | Created: 25/11/2025

Description: critical vulnerability in @babel/traverse

Detected By: Security Scan

Steps to Reproduce:

1. Check package.json dependencies
2. Run 'npm audit' locally
3. Observe vulnerability in package @babel/traverse

Expected Result:

Package @babel/traverse should be secure

Actual Result:

Package has critical vulnerability: critical vulnerability in @babel/traverse

107. Performance: Checkout API Slow

ID: 3 | Severity: Medium | Priority: Medium

Status: Open | Created: 25/11/2025

Description: Auto-detected issue from Performance Testing

Detected By: Performance Testing

108. Security: Lodash Vulnerability

ID: 2 | Severity: High | Priority: High

Status: Retest | Created: 25/11/2025

Description: Auto-detected issue from Security Scan

Detected By: Security Scan

109. Integration: Payment Flow Failure

ID: 1 | Severity: Critical | Priority: High

Status: In Progress | Created: 25/11/2025

Description: Auto-detected issue from Integration Testing

Detected By: Integration Testing
